ClassLink is a global education provider of access and analytics products that create more time for learning and help schools better understand digital engagement. As leading advocates for open data standards, we offer instant access to apps and files with single sign-on, streamline class rostering, automate account provisioning, and provide actionable analytics. ClassLink empowers 18 million students and staff in over 2,400 school systems.

Lightspeed Systems provides time-saving solutions and empowering districts to focus where it matters most—students and learning. Lightspeed provides one integrated platform of cloud-managed solutions: Security & Compliance, Safety & Wellness, and Engagement & Impact, purpose-built for school networks and devices. Lightspeed solutions are designed to surface insights and facilitate workflows needed to ensure a safe, secure, and compliant learning environment that works on any device, anywhere learning takes place. As a committed partner in privacy and security for more than 20 years, Lightspeed ensures secure student data with technical and administrative safeguards in place. And with a keen understanding of the staff and resource shortages in primary education, Lightspeed has focused resources on client success to provide implementation guidance, support, and an easy procurement process. Headquartered in Austin, Texas, Lightspeed serves more than 20 million students using 11 million devices in 28,000 schools throughout 41 countries.

Clever is on a mission to connect every student to a world of learning. More than 100,000 schools worldwide use Clever to power secure digital learning experiences. And, with Clever's layered security solutions, K-12 schools can protect district access and identities for all staff, teachers, and students. With a secure platform for schools and a network of leading application providers, Clever is committed to advancing education with technology that works for students everywhere.

Vivacity Tech PBC specializes in simplifying Google Chromebook deployment from day one, supporting over 2,000 school districts with exceptional customer service. We provide end-to-end device support for over 1 million active devices, minimizing downtime, protecting your technology investments, and ensuring classrooms run smoothly. As the only Public Benefit Corporation delivering EdTech hardware to K-12 schools, we are committed to ensuring that technology meets your needs. Our mission goes beyond providing products—we foster partnership, purpose, and progress. Discover the Vivacious difference at vivacitytech.com.

Educators have a growing list of responsibilities – AI can help. At the core of teaching is interacting with a child to help them grow—a deeply human, demanding, and complex responsibility. But today, teaching requires an unreasonable amount of work behind the scenes, much of it repetitive and tedious. We are a team of lifelong teachers and principals. We've not only taught in classrooms, but we've also spent countless hours doing behind-the-scenes work for our students, like adapting texts to different levels, writing exemplars, and emailing families. We know firsthand just how much work teachers do outside the classroom in an effort to make our time in front of students count. That's why we created MagicSchool.ai. We're here to help lighten the load, so teachers can save their energy for where they shine best—in the classroom, in front of students.

Identity Automation, a Jamf company, is a strategic partner to K–12 school systems modernizing learning through secure, scalable identity. Together with Jamf, we help districts simplify IT operations, strengthen cybersecurity, and enable Zero Trust–aligned access across devices, users, and applications. Our RapidIdentity platform automates the full identity lifecycle—from onboarding to offboarding—so students and staff have seamless, secure access to the tools they need, while IT leaders gain visibility, control, and confidence in their digital ecosystems.

Google for Education

Google for Education is an education–focused offering from Google that provides schools, educators, and students with a secure, cloud–based suite of tools and services designed to support teaching, learning, collaboration, and communication. It includes customized versions of Google Workspace (such as Gmail, Drive, Docs, Sheets, Slides, Calendar, Meet, and Classroom) and other tools, enabling real–time collaboration, assignment management, and digital learning experiences that work across devices like Chromebooks. The platform is widely used to enhance instructional impact, streamline administrative tasks, and empower learners and educators with modern, secure technology.

HPE is a leader in essential enterprise technology, bringing together the power of AI, cloud and networking to help organizations achieve more. As pioneers of possibility, our innovation and expertise advance the way people live and work. We empower our customers across industries to optimize operational performance, transform data into foresight, and maximize their impact. Unlock your boldest ambitions, with HPE.

Funds For Learning's mission is transforming student lives through government funding for Internet access. We are a leading E–rate compliance and consulting firm serving 4.67 million K–12 students nationwide. Our free E–rate Manager tool helps schools and libraries navigate their E–rate data easily.

The Lenovo logo, consisting of the word "Lenovo" in white sans-serif font on a red rounded rectangular background.

Lenovo is a multinational technology company founded in 1984 that designs, manufactures, and sells a wide range of products including personal computers, smartphones, servers, and IT solutions. Headquartered in Beijing with major operations in the United States, it is the world's largest PC manufacturer and operates in more than 180 markets worldwide.

The company focuses on delivering "smarter technology for all," expanding beyond hardware into software, cloud computing, artificial intelligence, and business services to support digital transformation for individuals and organizations.

In the past, learning was constrained by time and place. Today, digital transformation is opening a new world of educational opportunities—to learn in new ways, in new places, with new connections to resources around the globe. Cisco is leading this digital transformation in education with the Cisco Digital Education Platform, which supports blended learning opportunities, worldwide collaboration, and rich online media experiences. With this completely integrated digital environment, schools have the technology in place to ensure that buildings are connected, educators are empowered, administrators are informed, and students can learn without limits. For more information, visit www.cisco.com/go/education

ParentSquare is relied upon by millions of educators and families for unified, effective school communications. ParentSquare provides parent engagement tools that work from the district office to the individual classroom, supported by powerful metrics and reporting. ParentSquare's technology platform features extensive integrations with student information and other critical administrative systems, translation to more than 100 languages, and app, email, text, voice, and web portal access for equitable communication. ParentSquare, founded in 2011, is at <http://www.parentsquare.com>.

Palo Alto Networks, the global cybersecurity leader, is shaping the cloud-centric future with technology that is transforming the way people and organizations operate. Our mission is to be the cybersecurity partner of choice, protecting our digital way of life. We help address the world's greatest security challenges with continuous innovation that seizes the latest breakthroughs in artificial intelligence, analytics, automation, and orchestration. By delivering an integrated platform and empowering a growing ecosystem of partners, we are at the forefront of protecting tens of thousands of organizations across clouds, networks, and mobile devices. Our vision is a world where each day is safer and more secure than the one before. For more information, visit www.paloaltonetworks.com.

Education

CDW is a leading provider of technology and solutions to schools, with a mission of delivering engaging, collaborative, and interactive learning environments, while securing networks and optimizing data centers. Our

Microsoft Education is more than students sitting in a classroom. The expansion in Internet connectivity and the use of mobile devices has transformed learning and schools. The right technology is essential to support today's challenging learning environment. Microsoft's solutions for teaching and e-learning with Windows 8, Office 365, Lync, and SharePoint are fueling innovation and the future of learning.

Find out what's possible when work connects! Whether you're chatting with teammates or supporting customers, Zoom makes it easier to connect, collaborate, and reach goals — all with built-in AI doing the heavy lifting.

Secured Tech Solutions partners with K-12 school districts to support their 1:1 student device program by providing device lifecycle services— including repairs, protective accessories, buyback and recycling programs for iPads, Chromebooks, and MacBooks, and accidental damage protection plans. The company's offerings help schools maintain, protect, and maximize the value of their technology investments while simplifying device management and enhancing educational technology operations.

Amazon Community Impact & School Connectivity is a set of initiatives within Amazon focused on strengthening communities and expanding equitable access to education—particularly for underserved and underrepresented students.

The program leverages Amazon’s scale, technology, and partnerships with schools, nonprofits, and local organizations to improve digital access, STEM education, and future workforce readiness. This includes supporting computer science education, providing cloud-based tools and infrastructure, and helping organizations build innovative digital learning solutions that expand connectivity and opportunity.

Through these efforts, Amazon aims to bridge the digital divide, empower students with in-demand technology skills, and create pathways to careers in a rapidly evolving, tech-driven economy.

Logitech designs products that have an everyday place in people's lives, connecting them to the digital experiences they care about in ways that matter. In education, our tools and solutions make it easier for students to focus, support their creativity, and give them choices in how best to learn and interact with materials and apps. We empower educators to create and deliver dynamic lessons that engage and inspire their students. Founded in 1981 in Switzerland, Logitech started connecting people through innovative computer peripherals, and is now a multi-brand company designing products that bring people together through video, audio, gaming, creating and more. Brands of Logitech include Logitech, Logitech G, ASTRO Gaming, Streamlabs, Blue Microphones, Ultimate Ears and Jaybird. Learn more at www.logitech.com.

JAR SYSTEMS

Providing smarter, more versatile ways to charge and secure ever-evolving technologies. We work closely with our clients to develop products that support and streamline how mobile technology is used for learning and working in real-world environments. Our focus is on being a leader in innovative charging solutions and designing efficient products that will work dependably for many years down the road.
